Water cycle and rivers – human impact (e.g. flooding and trade)	Global Village – Human geography of European and non- European country (South America)
Unit 3	Mini unit – Geographical skills	Mini unit – Geographical skills	Mini unit – Geographical skills	Mini unit – Geographical skills	Mini unit – Geographical skills

A **geographer** needs lots of important skills to study the world! **Here are some of them:**

Hilpert Primary School Curriculum Overview

Map reading – Geographers use maps to learn about different places.

Observation – They look closely at nature, weather, and how people live.

Asking questions – Geographers ask questions like "Why do people live here?" or "What makes this place special?"

Using data – They look at numbers, charts, and pictures to understand information.

Problem-solving – Geographers help solve problems like pollution, climate change, and where to build new cities.

A **geographer** can do lots of exciting jobs! **Here are some examples:**

Cartographer – Makes maps to help people find places.

Meteorologist – Studies the weather and predicts storms, rain, and sunshine.

Urban Planner – Helps design cities, roads, and parks.

Environmental Consultant – Finds ways to protect nature and stop pollution.

Travel and Tourism Expert – Helps people learn about different countries and places.

GIS Specialist – Uses computers and satellites to study maps and locations.

Explorer or Researcher – Travels the world to study different places and cultures.
